

Klondike Silver Drilling - THINC ZINC

April 5, 2023, Vancouver, British Columbia: Klondike Silver Corp. (TSX.V: KS) (the “Company”) Further to the New Release of Oct 26, 2022 Klondike Silver continues drilling from drill station #2. The Company is exploring from underground, the western extension of the Silvana Mine, along the “**Main Lode**”. The “**Main Lode**” is a 9 km vein structure which is the most prolific **SILVER ZINC LEAD** structure in the Slocan Mining Camp.

ZINC

MacNicol & Associates, Asset Management Inc. of Toronto forwarded a February 16, 2023 **New York Financial Times** article by Derek Brower and Amanda Chu titled:

The US plan to become the world’s cleantech superpower.

An excerpt follows:

POWERING GROWTH

In a warehouse in Turtle Creek, just east of Pittsburgh, Pennsylvania, a line of workers are assembling batteries, each about the size of a suitcase, based on zinc — an alternative to lithium-ion that its proponents say will offer competitively priced, non-flammable, dispatchable energy for hospitals, schools and other stationary users.

It’s a young cohort of workers, many people of colour and military veterans. “We’re hiring right out of high school,” says Joe Mastrangelo, the Edison, New Jersey-based head of Eos Energy Enterprises, the company making the batteries.

His goal for the factory in western Pennsylvania is to double its total capacity to 3 gigawatt-hours in 2024, producing a battery every 90 seconds once the plant is fully automated. The workforce will also double, to 500.

“We’re doing this in a location that was historically an old energy economy, creating not jobs but career paths for people to get to middle class,” Mastrangelo says.

About Klondike Silver

- **Klondike’s Silvana Mine Silver Zinc Lead project** is located in South Eastern B.C.
- **Klondike’s 114 square kilometer claim block** is 138 km north of the Trail B.C. smelter.
- **Klondike Silver is exploring from underground**, along the 9 km “Main Lode”. The “Main Lode” is the most prolific mineralized structure in the Slocan Mining Camp.
- **There are 13 past producing mines that are situated along the “Main Lode”** which have produced 886,000 kg of silver, 95 million kg of zinc and 117 million kg lead so far. (source: BC MINFILE).
- **There are 67 past producing mines that are situated in Klondike Silver’s 114 square kilometer claim block.** (source: BC MINFILE).
